

Sociodemographic and Psychosocial Patient and Physician Factors in Oncology Treatment Decision-Making

Join Our Research Study!

What?

We want to understand how the background, experiences, and personal beliefs of patients and physicians affect the way they make treatment decisions together AND how these decisions impact patient's health. Share your experiences in a focus group with us!

Who?

- 18 years old or over
- Living in Alberta
- Received a cancer diagnosis within the past 2 years
- Referred to a medical oncologist for a chemotherapy assessment
