

Share your views on how oncology treatment decisions are made

The goal of this study is to talk with cancer patients and family caregivers to understand their opinions on how cancer treatment decisions are made.

WHO IS ELIGIBLE?

Must be 18 years of age or older with a cancer diagnosis OR a caregiver 18 years of age or older to an adult patient with a cancer diagnosis.
Must be able to speak and read English and capable of providing informed consent.

WHAT IS INVOLVED?

You will be asked to participate in an online focus group (approximately 90 minutes) to share your thoughts and experiences regarding how oncology treatment decisions are made.

WHAT IS THE GOAL?

Your responses will be used to understand factors related to decision making around value assessment frameworks in oncology treatment decisions making. Using this information, we can help develop healthy policies with patient centered goals at the forefront.

Please reach out to our study team to sign up for a focus group!
